WORK EXPERIENCE

San Francisco Ethics Commission – Client Support Specialist

December 2024 – Present

- Serve as the primary technical point of contact for users across multiple compliance SaaS platforms (Campaign Finance, Lobbyist, Form 700)
- Own and resolve platform issues end-to-end by analyzing user behavior, system constraints, and data discrepancies while coordinating with engineering teams and vendors
- Guide stakeholders through workflows and demos, helping them complete filings and understand system logic
- Deliver training sessions and create documentation (FAQs, guides, e-learning) to improve adoption and reduce repeat issues
- Developed Python scripts to audit WordPress pages for missing image alt text and automate remediation, supporting ADA compliance; leveraged AI tools (Claude, ChatGPT) to generate compliant alt text at scale
- Prioritize and manage multiple support requests based on urgency, impact, and user needs in a high-volume environment

Department of Public Works – Design Trainee II

May 2019 - July 2024

- Supported multiple city departments by troubleshooting technical issues, onboarding users to new systems, and recommending software solutions based on operational needs.
- Built internal web tools using HTML, JavaScript, and CSS to centralize project information and improve staff access to critical engineering data.
- Authored technical documentation and conducted training sessions to help employees adopt new software and workflows.
- Led a team in digitizing and analyzing legal and engineering records, facilitating their use in ongoing cases, projects, and supporting the department's transition to a new building.

Tesla – Data Engineering Analyst

July 2023 - January 2024

- Partnered with engineering teams to improve the reliability of testing workflows by debugging and enhancing a production VBA data system used to track vehicle test metrics.
- Interpreted testing data and delivered 20+ structured reports explaining progress, issues, and impact to technical stakeholders
- Built and supported a Python automation tool that processed 100+ datasets, reducing manual processing time from weeks to minutes and improving data accuracy.
- Developed dashboards and interactive visualizations enabling engineers to understand performance trends and make decisions.
- Created internal workflow tools (SharePoint, Confluence, Jira integrations) to track test status and improve communication across teams.
- Co-developed an internal MERN-based inventory platform with role-based authentication to support operational teams managing hardware resources.

Google – Computer Science Summer Institute (CSSI) Intern

July 2017 - August 2017

- Built a Python application integrating external data sources (Wikipedia, YouTube APIs) to extract, process, and classify music data
- Developed web components using HTML, CSS, JavaScript, and Google App Engine
- Collaborated with engineers and peers to design and deliver a functional end-to-end application

PROJECTS

Tesla – Data Automation project

July 2023 - January 2024

- Developed Python-based data processing software at Tesla, reducing processing time from two weeks to minutes, achieving an increase in test report efficiency.
- Automated data parsing and report generation across large datasets, improving accuracy and efficiency

EDUCATION

California State University, Sacramento – Bachelor of Science in Computer Science, Minor in Mathematics

May 2022

- **Relevant Coursework:** Database Management, Object-Oriented Programming, Software Engineering Project Management

SKILLS

- **Languages:** Java, JavaScript, HTML/CSS, SQL, Python, MongoDB
- **Technologies:** Linux, Jira, Heroku, Django, Gitlab, Visual Studio, Tableau, MySQL, Confluence, MS 365, Git, BigQuery
